

Project Development Phase Delivery of Sprint - 3

Date	01 November 2022
Team ID	PNT2022TMID43835
Project Name	AI-based discourse for Banking Industry

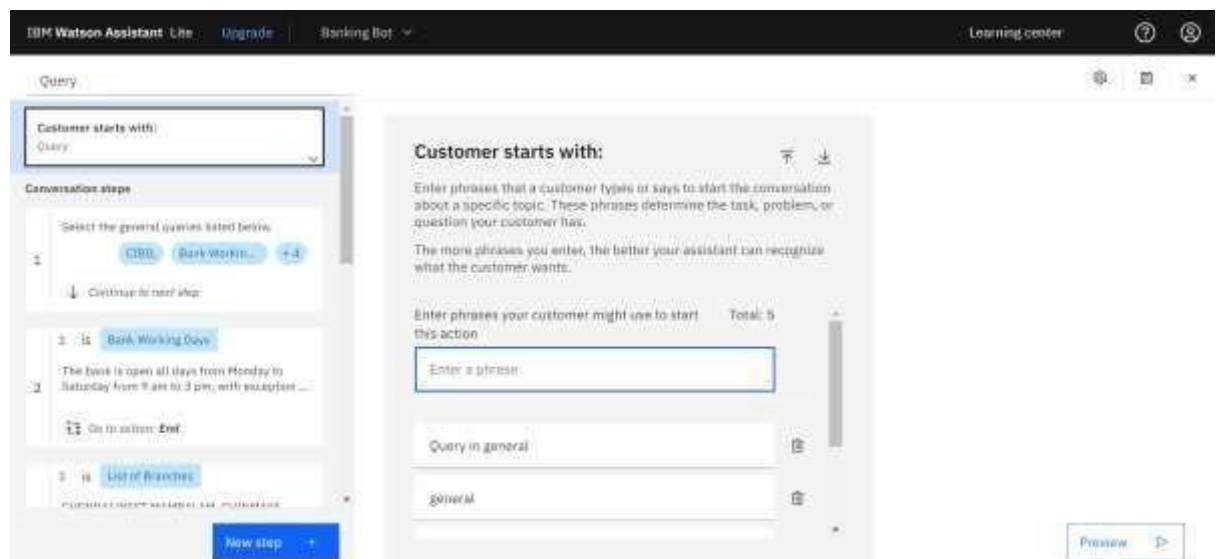

Creating Loan Account Action

Loan action is created with the necessary steps.

Creating General Query Action

General query action is created with the necessary steps.

Creating Net Banking Action

Net banking action is created with the necessary steps.

The screenshot shows the IBM Watson Assistant interface for configuring a 'Net Banking' action. The top bar includes 'IBM Watson Assistant Lite', 'Upgrade', 'Banking Bot', and 'Learning center'. The sidebar on the left is titled 'Net Banking' and contains a 'Conversation steps' section with three steps: 1. 'What queries do you have regarding Net Banking?' (with sub-phrases 'What are the...' and 'What is Net B...'), 2. 'What is Net Banking?' (with description 'The facility offered by the bank allows customers to use banking services over the...'), and 3. 'How do I register for Net Banking?'. The main area is titled 'Customer starts with:' and contains instructions: 'Enter phrases that a customer types or says to start the conversation about a specific topic... These phrases determine the task, problem, or question your customer has. The more phrases you enter, the better your assistant can recognize what the customer wants.' Below this, there is a section 'Enter phrases your customer might use to start this action' with a 'Total: 1 action' indicator. A text input field contains 'Enter a phrase:' and a button 'Net Banking' is visible. At the bottom right, there is a 'Preview' button.

In addition to this greeting, end greeting ,index and end actions are also created.
