

Final Deliverables

Running Application

Date	11.11.2022
Team Id	PNT2022TMID01145
Project Name	AI Based Discourse for Banking Industry

The screenshot shows the Spyder Python IDE interface. The left pane displays the code for `app.py`, which is a Flask application. The code defines a `bot()` function that renders a template and runs the application. The right pane shows the 'Console' tab, which displays the output of the application, including the Flask server startup message and several HTTP requests and responses.

```
1 from flask import Flask, render_template
2
3 app = Flask(__name__)
4
5
6 @app.route("/")
7 def bot():
8     return render_template('Chatbot.html')
9
10
11 if __name__ == '__main__':
12     app.run()
13
```

Console 1/A

```
* Serving Flask app "app" (lazy loading)
* Environment: production
  WARNING: This is a development server. Do not use it in a production deployment.
  Use a production WSGI server instead.
* Debug mode: off
